RE: Accessibility to the municipal office facilities

During a recent council meeting, it came to my attention that the Municipal office was in serious need of improvements to the washroom facilities, in that they are not accessible to the physically challenged.

As the President of the Steenburg Lake Community Association (SLCA), I believe it is important that we speak out on important issues, and lend support to our community when it is needed.

As you are aware, we are a non-profit organization which represents the 224 registered properties on Steenburg Lake. Several of our members are retired, while others are aging and/or living with disabilities.

The Municipal building is very much a part of our community and an important resource to our members. The washroom facilities should be accessible to wheelchairs, with counters adjusted to proper height, and doors that can be easily operated.

The SLCA also understands that there are government programs that can provide financial assistance with these upgrades, and we support your application for this funding.

Please let us know if you require any additional correspondence from our association to these agencies, or if you are planning any other fundraising events where our members can be of assistance.

Sincerely,

Anthony Genovese
SLCA, President
